

# The Elite Handspray

Designed with the purists in mind.

With a unique tubular shape and finished off in highly polished chrome, it will compliment any bathroom.

## High Quality Constructio

All the Hand spray models are made from high quality chrome plated brass.

Unlike other sprays available those are made from plastic and break easily.

All external and internal parts are metal, this is the reason that only Handspray products can handle the high pressure water supply that most Australians experience in their homes.

This product has been tested to over 1500 KPA and holds Australian standards approval.
