

ELECTRIC WATER HEATERS
HOT WATER SOLUTIONS PRODUCT GUIDE

1915 • 2015 | Celebrating 100 years

WHICH WATER HEATER DO I NEED?

With the number of water heaters available on the market, choosing the right one can be quite a challenge.

If you're looking to replace an existing electric storage water heater, the Proflo range is ideal. With water connections on both sides of the tank and a variety of sizes to choose from, replacement is quick and easy.

If you're serious about reducing your carbon footprint, consider a Sunpro solar hot water system with electric booster.

Or if your home doesn't have the right orientation or roof space to install solar collectors, the Airoheat is an excellent environmentally friendly choice and doesn't require solar panels.

BEFORE YOU MAKE A DECISION ABOUT WHICH HOT WATER SYSTEM IS RIGHT FOR YOUR HOME, THINK ABOUT:

- How much hot water you use daily
- Whether the size of your hot water system is sufficient for your household
- How much space you have
- How environmentally conscious you'd like to be
- Your budget
- Whether the system will be located inside or outside
- If selecting solar, whether you have adequate north facing roof space for collectors

proflo[®] for homes of all sizes

TOUGH BUT STYLISH HOT WATER SYSTEMS THAT WILL GO THE DISTANCE.

If you're looking to replace an existing electric storage water heater, Proflo is an ideal solution - available in a variety of tank sizes for homes of all sizes and delivering full mains pressure.

- Easy installation, with water connections on both sides of tank
- Low maintenance and long service life
- Full flow pressure to all outlets
- Can be installed indoors or out
- Hard-wearing, tough polymer end plates resist damage and moisture
- Available in single element and twin element (315L and 400L only)
- Steel tank features rock-hard Duro-namel[®] vitreous enamel to maximise tank life and durability
- 7-year tank warranty, including 1-year full parts and labour*

| NO. OF ADULTS & CHILDREN | | CAPACITY |
|--------------------------|---------------|----------|
| Continuous Tariff | Off Peak | |
| 1 adult icon | | 25L |
| 2 adult icons | | 50L |
| 3 adult icons | | 80L |
| 4 adult icons | | 125L |
| 5 adult icons | 2 adult icons | 160L |
| 6 adult icons | 3 adult icons | 250L |
| 7 adult icons | 4 adult icons | 315L |
| 8 adult icons | 5 adult icons | 400L |

Adult icon can represent dishwasher or washing machine.
 Continuous Tariff: Provides power so that your water can be heated at any time of the day or night.
 Off Peak: Generally only provides power for your water heater for between 6-12 hours a night - check with your local electricity retailer for details of off-peak hours.

SO MANY SIZES FOR HOT WATER
YOU CAN'T GO WRONG.

electric storage

airoheat® *air-sourced heat pump*

POWERFUL, EFFICIENT AND ENVIRONMENTALLY FRIENDLY.

If your home doesn't offer suitable roof space and orientation for installing solar collectors, Airoheat is the next best choice in environmentally friendly water heaters, without the need for solar panels.

Working like a refrigerator but in reverse, it takes air in from outside the tank and uses it to heat water. Its patented in-tank heating coil ensures direct heat transfer, eliminating exposure to heat loss issues often associated with other styles of heat pump.

- Composite condensation tray is designed for rapid drainage in high rainfall areas
- Dual anodes provide greater protection against tank corrosion
- Patented in-tank heating coil to improve heat transfer
- Improved thermal efficiency minimises heat loss due to a fully insulated storage tank and a robust refrigeration system
- Water connections on both sides of tank provide easy installation
- 5-year tank warranty, 2-year refrigerant components, 1-year full parts and labour*

**AUSTRALIA'S MOST HIGHLY AWARDED
ENVIRONMENTAL WATER HEATER**

sunpro® free energy from the sun

OUTSTANDING EFFICIENCY TO HELP REDUCE ENERGY BILLS.

If you're aiming to reduce your carbon footprint, choose the Sunpro electric solar water heater. Sunpro uses the sun's energy to heat water via solar panels. It also an electric booster, ensuring hot water on cloudy days or in times of high demand.

Sunpro will save you money on energy bills, providing an economical, sustainable hot water solution for years to come.

- Next generation split system design provides flexible installation locations without the need for expensive roof reinforcement
- Multi-temperature sensors on a vitreous enamel tank configuration enable optimum solar gain while reducing the risk of overheating
- High performance collectors ensure efficient transfer of heat to water
- Patented Hotlogic® processor maximises energy from the sun
- In instances of minimal solar gain, an internal element heats the top half of the tank
- 5-year tank and panel warranty, 1-year parts and labour*
