MULTIPOINT HYDROTHERAPY FOR YOUR BATH

THE BENEFITS TO YOUR BODY AND MIND

Improved muscle tone and mobility

The water flow from the jets massages and relaxes your muscle tissue improving the mobility of your joints and muscles relieving cramps, stiffness and soreness.

Overall muscle definition and tone can be improved by the stimulating massage, making Multipoint personalised hydrotherapy an excellent addition to your fitness and wellbeing regime.

Prevention and Recovery from Injuries

Regular hydrotherapy is a proven method of reducing recovery time from sporting and other injuries. Weakened muscles and ligaments are strengthened by the customised massage effect.

Increase blood flow and stimulation of lymphatic system

Circulation is increased bringing fresh oxygenated blood to your muscles and joints. By stimulating the flow of lymph, the correct fluid balance in the tissues and blood is achieved.

Cleanses and conditions the skin

The unique water massage over your skin stimulates the sweat glands, flushing out unwanted grime in your pores leaving your skin more elastic and youthful.

Benefits from acupuncture and reflexology

Certain areas of the body and especially the back and feet correspond to various organs and nerve pathways. Customised massage on these specific areas can help relieve certain health conditions.

Hygiene & Sanitisation

Only Multipoint Systems can assure you of a safe and hygienic spa environment.

All Multipoint Systems are fitted with the exclusive sanitising portal that provides direct access to the jets and system to allow their proper sterilisation.

All systems are plumbed with rigid piping (to confirm with Australian standards) to ensure all water is fully drained and the system is left dry between usages.

Both these features are essential in order to provide a hygienic environment for your wellness and peace of mind.

Massage Plus jet - spiralling flow

The jets spiral a powerful water flow, to provide a sensuous kneading of the back and shoulders, relieving muscle tension and allowing the body's central 'framework' to relax.

Toning jet - wide powerful flow

Toning jets give a vigorous massage for areas such as hips, thighs and calves. These are especially beneficial in the treatment of painful or injured muscles, as a warm-up prior to exercise, or as a general skin and muscle toning aid.

Reflexology jet - precise gentle flow

Reflexology jets are essential in treatment of localised pain, including headaches, muscle injuries and strains.

Positioning of jets

Whether you choose a customised or package spa solution, the Multipoint System optimises each jet location to achieve maximum therapeutic benefit.

Design of jets

To enable a Multipoint System to be tailored precisely to your body, we designed special jets that are able to be positioned anywhere in the bath without compromising your comfort.

These powerful micro-sized jets, with a unique range of functions, deliver specific and different water flow and massaging effects for each area of the body.

While the Multipoint jets are small, the jet body is specifically designed to give a more powerful massage effect than many larger whirlpool jets.

How to Order

Ask your REECE representative about the following systems:

14 Jet Package

20 Jet Package

24 Jet Customised System

36 Jet Professional System

Order Forms are available at

www.bathe.net.au

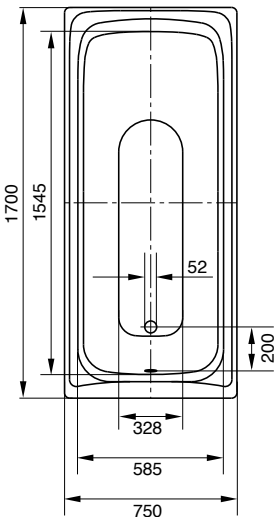

or

from your Reece representative.

UPGRADE OPTIONS

AIR SPA

The BATHE Airspa is a stimulating experience created by thousands of air bubbles stroking the skin as they rise to the surface.

Air spa may be chosen in addition to your hydrotherapy as a 'dual system' and is the only spa system suitable for freestanding baths.

AIR-BOOST

Air-Boost provides adjustable strength from vigorous to powerful.

For a restful and relaxing bath, the gentle setting allows the flow from the jets to be in claming mode.

When extra boost is needed the setting can be changes to an extra powerful flow that will immediately increase circulation and stretch muscle tissue.

MULTIFUNCTIONAL CUSHION

The new multifunctional cushions from Kaldewei add even more comfort to your relaxing bath, offering you different options; as a footrest or placed below the things, they keep you from sliding downward in larger baths; as a neck rest or placed at the sides of the tub, they give you a place to rest your arms.

MULTI BATH FILLER AND OVERFLOW OUTLET OPTION

A Pop-up waste and overflow unit is supplied as a standard inclusion on most models.

A Multi overflow including the bath filler function is an option available for all models.

Note: This item is not Australian Standards certified or watermarked and an approved backflow prevention device is required at time of print.

BATHTUB PILLOW

The Kaldewei bathtub pillow is wonderfully soft and flexible, and so it adapts perfectly to any shape of neck and bathtub. The delightfully soft, skin-friendly fabric cover is machine washable. A generous 50 x 30cm, the cushion also supports the shoulders and allows a variety of head positions. With a valve for easy control of the level of hardness.
